

The St. George Maker Space Collaboration with Mid Coast School of Technology
St. George Municipal School Unit
Contact: Mike Felton, Superintendent

Overview:

St. George Municipal School Unit is partnering with Mid-Coast School of Technology to create a K-12 Career Technical Education (CTE) Program and build a K-8 CTE/Makerspace Building at St. George School. Through the K-12 CTE program, St. George School will continue a long tradition of place-based education that grounds student learning in the history, traditions, and natural environment of St. George. The program will provide a model for preparing students, from the day they enter kindergarten through high school graduation, to develop the technical, creative thinking, and social-emotional skills to thrive in an innovation economy and strengthen our local and regional economies by meeting existing labor force needs and creating new businesses and industries.

Students Impacted:

Approximately 300 (Age Range: 5-18) (21/22SY K-12 St. George MSU enrollment) As we integrate with Mid-Coast School of Technology and their high school programming, this number will increase.
